

TriStar 2019 Saturday, 2 March

A full day of speakers, displays, prizes, and more.

Morning Presentations (beginning at 9:30):

- Mike & Larry Puzio (OSIRIS-Rex Ambassadors) – OSIRIS-REx Arrival at Asteroid Bennu
- Ward Howard (UNC-CH) – Do Superflares Make Proxima b & the Nearest Terrestrial Exoplanets Uninhabitable?

Afternoon Presentations (beginning at 2:00):

- John O’Neal (NASA Ambassador) – The Past, Present and Future of the NASA Parker Solar Probe
- Stella Kafka (AAVSO) – The AAVSO for the Amateur Community

The venue opens at 8:30 a.m. A detailed schedule will be posted at Cline Observatory’s TriStar page soon – check here later for details: <https://www.gtcc.edu/community-engagement/cline-observatory/special-lectures-and-events/tristar.php>.

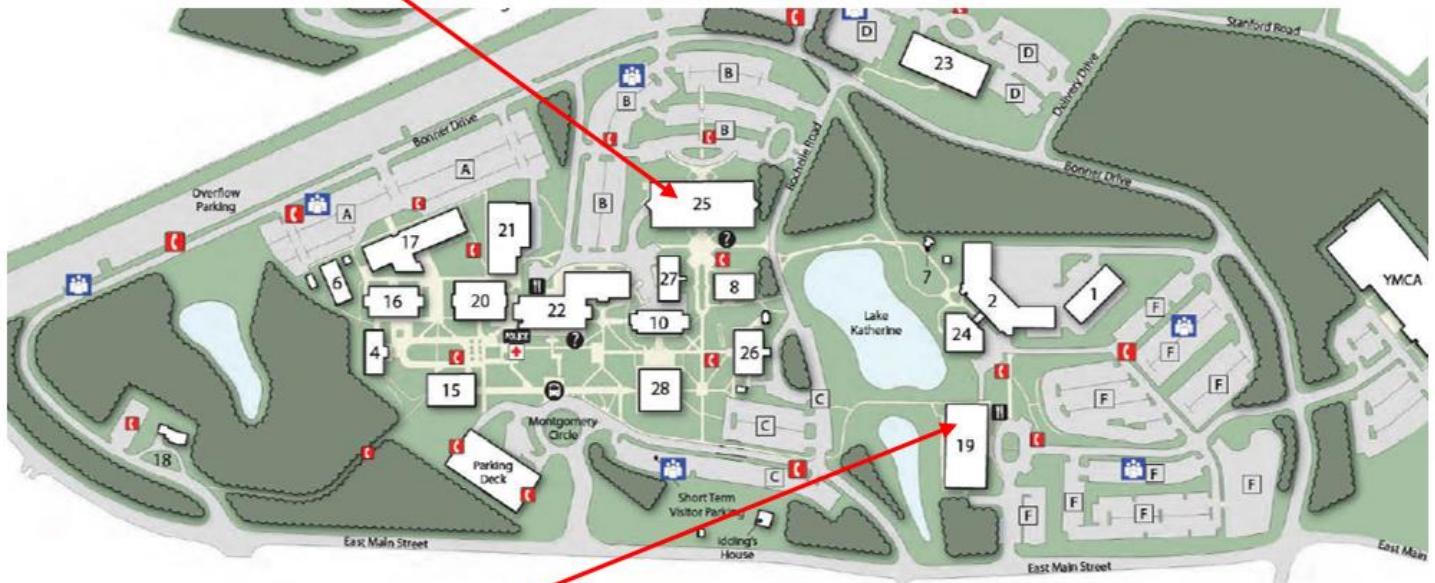

All presentations will be in the Koury Auditorium, and displays, refreshments, etc. will be in adjacent spaces on the first floor.

Pre-TriStar Friday night lecture: Stella Kafka will give a free public presentation about Variable Stars at 7:00 p.m. on Friday, 1 March, in Koury Auditorium.

TriStar has Moved!

Due to campus renovation and relocation of various GTCC offices, we have lost much of our traditional gathering space, so TriStar will move across campus, from the Sears Applied Technologies Center to the Koury Hospitality Careers Center (see map below).

Tristar was here in the past (DON'T GO THERE THIS YEAR!)

TriStar will be held here this year. (Park in Lot F)
